

Safety and Integrity  
Through Trusted Files.

Glasswall is a file regeneration and analytics company and a leader in the field of Content Disarm and Reconstruction (CDR).

We regenerate a file to a safe standard of 'known good', enforcing the format's structural specification and eradicating high-risk active content.

## How Glasswall Works

### Untrusted Original File

Deep File Inspection  
Reveals Functional and  
Structural Layers

Sanitise High-risk Macro,  
Javascript, Acroform  
and URLs

Remediate File Structure  
Deviations to Manufacturer  
Specification

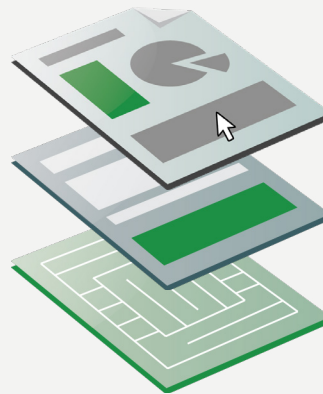

### Clean and Safe New File

Visual Content  
Unchanged

Malware Payloads  
and Phishing Links  
Removed

Elusive Malicious  
Code Disarmed

# The Threat

66% of advanced malware launches by opening an attachment.

(Source: Verizon)

48% of SMBs said a major data breach would shut down their business permanently.

(Source: Appraver Cyberthreat Index Q1 2019)

69% of organisations say threats they face can't be stopped by anti-virus.

(Source: Cisco 2018 Cyber Security Report)

- Seamless and non-disruptive onboarding
- Protection from advanced threats and ransomware

## Glasswall Products

Glasswall's award-winning technology is available across a number of platforms and services, delivering safe, clean and visually identical files in any business process.
